Scoring Interpretation

The scores you received on the LTQ provide information about how you see yourself and how others see you as a leader. The chart allows you to see where your perceptions are the same as those of others and where they differ.

The example ratings show how the leader self-rated higher than the observers did on the characteristic *articulate*. On the second characteristic, *perceptive*, the leader self-rated substantially higher than others. On the *self-confident* characteristic, the leader self-rated quite close to others' ratings but lower. There are no best ratings on this questionnaire. The purpose of the instrument is to give you a way to assess your strengths and weaknesses and to evaluate areas where your perceptions are congruent with those of others and where there are discrepancies.
